#### **Independent Auditors' Report**

#### To the Shareholders of Commonwealth Bank Limited

#### **Opinion**

We have audited the consolidated financial statements of Commonwealth Bank Limited and its subsidiaries ("the Group"), which comprise the consolidated statement of financial position as at December 31, 2022, the consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information shown on pages 7 to 92.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2022, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS").

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (the "IESBA Code") and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### **Independent Auditors' Report)**

#### **Key Audit Matters**

#### Impairment assessment of loans and advances to customers ("Loans") (see notes 9 & 24)

#### Key audit matter

As at December 31, 2022, Loans comprise 42.89% of the Group's total assets, with total gross Loans of \$862.23 million and the related expected credit loss ("ECL") impairment allowance of \$75.98 million.

The Group determines its Loans ECL as a function of four key factors: Probability of Default ("PD"), Loss Given Default ("LGD"), Exposure at Default ("EAD") and the discount rate. The Group models these factors independently and uses various assumptions to develop the models. Key judgments and elements driving higher degrees of estimation uncertainty in the Loans ECL are as follows:

- PD model: The Group has developed and implemented

   a subjective risk parameter PD model based on
   migration probabilities between the risk ratings in a oneyear period. The migration probabilities are assembled
   in a form of a transition matrix. The PD method applied
   requires significant judgement.
- Significant increases in credit risk "SICR": To assess whether an individual loan facility has experienced a SICR since initial recognition, the Group relies on a subjective internally developed risk rating system described further below. The selection of criteria for identifying SICR is highly dependent on judgement and may significantly impact the staging of loan facilities.
- Forward Looking Indicator ("FLI") adjustments: The Group developed a scorecard to assess the impact of macroeconomic factors on the Loans ECL and specifically the FLI adjustment for the PD. The macroeconomic variables chosen, reflect management's judgement relating to the behaviour of the economy and the impact on the performance of the Group's portfolios.
- Internal risk rating ("IRR") model and assumptions: Internal ratings are assigned to each loan facility according to the Group's risk management framework and dependent upon management's selected risk characteristics. Each loan facility is assigned a risk rating from 1-8 based (on a calculated risk score) on the borrower's performance pattern and loan characteristics. Specifically, the following data inputs are used to determine the risk rating:
  - Credit scores assigned to each loan at the inception of the loan
  - Days past due number of days late on a loan payment
  - Loan status (restructured, re-written or current)
  - Payment type (interest & principal or principal only)
  - Loan type (e.g. automotive, education, vacation)
  - Recency of payment (only applicable to consumer loans)
  - Discounted collateral value (applicable to mortgages, commercial, and equity financed consumer loans)

#### How the matter was addressed in our audit

As part of our procedures, we performed the following:

- Updated our understanding of the methodology, model and assumptions used in the calculation of the Loans ECL.
- For adjustments identified, we tested the control over the review and approval of such adjustments by those charged with governance.
- On a sample basis, we tested the accuracy of relevant data inputs through direct confirmation with external parties and by validating internal information obtained from the Bank (loan balances, interest rates, contractual maturities, collateral values, days past due, credit scores, loan status, etc.) used in the calculation of the final risk rating.
- We performed analytical procedures over internal data to assess the appropriateness of the staging of restructured loans, credit impaired loans, loans modified during the year, and loans with increases in days past due at the reporting date.
- We selected a sample of collateralized loans, and obtained the latest appraisal report. We assessed whether the estimation approach for the collateral is in line with the requirements of IFRS 9, and the appraised value when compared to other comparable assets, is considered reasonable.

We engaged our KPMG credit specialists, to assist us in performing the procedures below:

- Assessed the theoretical soundness and appropriateness of the methodology of the Loans ECL models with respect to the models' design and objective. Models with higher estimation uncertainty evaluated by our credit specialists include (PD, SICR, LGD, IRR and ELI)
- Performed a walkthrough of the Loans ECL model inputs, outputs and processes.
- Executed a supervised replication that generates model parameters to calculate the model outputs and Loans ECL results.
- Performed an evaluation of the Bank's methodology used to calculate its ECL and to assess the appropriateness of the methodology and all final parameters including the final calculation, the PD, the PGD, EAD, expected lifetime of credit facilities, SICR, effective interest rate and FLI.
- ■Performed a retrospective evaluation of the 12-month PD for the period 2018 to 2022 to identify bias in management's assumptions underlying the estimates for the loans ECL and analyzed the ECL model's predictive power.

#### **Independent Auditors' Report (continued)**

#### **Key Audit Matters (continued)**

Impairment assessment of loans and advance	es to customers ("Loans") (see notes 9 & 24)
Key audit matter	How the matter was addressed in our audit
LGD model: The LGD model applied by the Group is based on subjective factors that are qualitatively set by the management, without any statistical calibration.	
The ECL is a complex calculation, involving various models derived from management's judgments and assumptions resulting in a high degree of estimation uncertainty. In addition, the Loans ECL is calculated in an ECL model with a specific algorithm. The conceptual soundness of the model's algorithm impacts the overall precision of the ECL. Finally, the ECL on Loans is material to the consolidated financial statements as a whole and for these reasons, we deem this a key audit matter.	

#### Impairment assessment of investments carried at amortized cost (see notes 8 & 24)

#### Description of key audit matter

As at December 31, 2022, Investments carried at amortized cost ("Investments"), comprise 39.29% of the Group's total assets, with total gross investments carried at amortized cost of \$723.60 million and the related expected credit loss ("ECL") impairment allowance of \$3.24 million.

Key judgments and estimates driving higher degrees of estimation uncertainty in respect to the ECL on investments carried at amortized cost are summarized below:

- <u>LGD model</u>: To determine an appropriate LGD for Bahamas' sovereign exposures, the Group analyzed actual losses experienced in recent debt restructurings of various Caribbean nations. Management applied a weighting mechanism for best, base and worst case scenarios. Given the very limited data on sovereign recovery rates, the estimates used to determine the LGD for Bahamas sovereign exposures are highly subjective.
- SICR: The selection of criteria for identifying SICR is internally developed and highly dependent on judgement and may significantly impact the Investments ECL.
- <u>FLI:</u> Significant judgement is considered when selecting macroeconomic forecasts. Such macroeconomic factors are used to calculate the Investment ECL under multiple probability weighting scenarios.

Given the level of significant management judgements involved in determining the LGD and FLI models for the Investments carried at amortized cost and considering the Investments ECL is material to the consolidated financial statements as whole we deem this a key audit matter.

#### How the matter was addressed in our audit

As part of our procedures, we performed the following:

- Updated our understanding of the methodology, model and assumptions used in the calculation of the Loans ECL.
- For adjustments identified, we tested controls over the review and approval of the adjustments by those charged with governance.
- On a sample basis, we tested the accuracy of key data inputs through direct confirmation with external parties and with internal information obtained from the Bank (investment balances, contractual maturities, interest rates) used in in the Investments ECL calculation.

We engaged our KPMG credit specialists, to assist us in performing procedures below:

- Assessed the theoretical soundness and appropriateness of the methodology of the Investments ECL models with respect to the models' design and objective. Models with higher estimation uncertainty evaluated by our credit specialists include (LGD, SICR and FLI).
- Challenged management's assumptions used in determining the LGD for the Government of the Bahamas' Sovereign instruments and applied benchmarking analysis.
- Performed a walkthrough of the Investments ECL model inputs, outputs and processes.
- Performed an evaluation to assess the appropriateness of the methodology and all final parameters including the final calculation, the PD, LGD, EAD, expected lifetime of investment facilities, SICR, discount rate and FLI.

# Independent Auditors' Report (continued) Key Audit Matters (continued)

#### Other Information

Management is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the consolidated financial statements and our auditors' report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

#### Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due
  to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence
  that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion,
  forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
  appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
  Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.

#### **Independent Auditors' Report (continued)**

#### Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (continued)

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the
  disclosures, and whether the consolidated financial statements represent the underlying transactions and
  events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business
  activities within the Group to express an opinion on the consolidated financial statements. We are responsible
  for the direction, supervision and performance of the group audit. We remain solely responsible for our audit
  opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is John Lopez.

Nassau, Bahamas April 26, 2023

#### **CERTIFICATION**

This Certificate is prepared in accordance with the provisions of the Insurance Act, 2005 in respect of the life and health insurance business of Laurentide Insurance and Mortgage Company Limited.

I have examined the financial position and valued the policy liabilities for its Statement of Financial Position s at December 31, 2022, and the corresponding change in the policy liabilities in the Statement of Profit and Loss and Other Comprehensive Income for the year then ended.

# In my opinion

- 1. The methods and procedures used in the verification of the valuation data are sufficient and reliable and fulfill the required standards of care
- 2. The methods and assumptions used to calculate the actuarial and the other policy liabilities are appropriate to the circumstances of the company and of the said policies and claims
- 3. The valuation of actuarial and other policy liabilities has been made in accordance with generally accepted actuarial practice (with such changes as determined and any directions made by the Insurance Commission of the Bahamas)
- 4. The valuation is appropriate under the circumstances of the company and the financial statements fairly reflect its results
- 5. Having regard for the results of the investigation performed pursuant to section 62 of the Insurance Act, 2005 the value of actuarial and other policy liabilities, when taken together with the total capital available makes good and sufficient provisions for all unmatured obligations under the terms of the policies in force

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### 1. Incorporation and Activities

Commonwealth Bank Limited (the "Bank") was incorporated in The Commonwealth of The Bahamas ("The Bahamas") on April 20, 1960, and is licensed by the Central Bank of The Bahamas (the "Central Bank") to carry out banking business in The Bahamas under the provisions of the Banks and Trust Companies Regulations Act 2020.

The Bank's shares are publicly traded and listed on The Bahamas International Securities Exchange ("BISX").

The principal activities of the Bank and its subsidiaries (the "Group") are described in Note 6. The registered office of the Bank is situated at Sassoon House, Shirley Street, Nassau, Bahamas.

# 2. Summary of Significant Accounting Policies and Basis of Preparation

# (a) Basis of preparation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board. These policies have been consistently applied to all years presented and are compliant with IFRS.

The consolidated financial statements for the year ended December 31, 2022, have been approved by the Board of Directors on April 25, 2023.

The consolidated financial statements have been prepared under the historical cost basis except for certain financial instruments that are measured at fair value.

#### (b) Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise judgment in the process of applying the Group's accounting policies. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are recognised prospectively. Actual results could differ from those estimates.

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed in Note 3.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

# (c) Principles of consolidation

The consolidated financial statements include the assets, liabilities, financial performance and cash flows of the Group and all of its subsidiaries, after the elimination of intercompany transactions and balances. Subsidiaries are defined as entities controlled by the Group and exclude associates and joint arrangements. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and can affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

Intra-Group transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. The accounting policies of subsidiaries are consistent with the policies adopted by the Group.

#### Voting-interest subsidiaries

Control is presumed with an ownership interest of more than 50% of the voting rights in an entity unless other factors indicate that the Group does not control the entity despite having more than 50% of the voting rights of the entity.

#### (d) Changes in significant accounting policies

New standards, amendments and interpretations adopted by the Group

Standards and amendments and interpretations to published standards that became effective for the Group's financial year, beginning on January 1,2022 were, either not relevant or not significant to the Group's operations and accordingly did not have a material impact on the Group's accounting policies or consolidated financial statements.

New standards, amendments and interpretations not yet adopted by the Group

The application of new standards and amendments and interpretations to existing standards that have been published but are not yet effective are not expected to have a material impact on the Group's accounting policies or consolidated financial statements in the financial period of initial application, except for IFRS 17 *Insurance Contracts* ("IFRS 17").

IFRS 17 defines clear and consistent rules that aim to increase the comparability of financial statements. For insurers, the transition to IFRS 17 will have an impact on financial statements and key performance indicators. IFRS 17 is applicable for annual periods beginning on or after January 1, 2023. The assessment of the impact on the Group of adopting the standard and proposed amendments is ongoing with external specialists.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### (e) Financial assets and liabilities Financial assets

Recognition and initial measurement

A financial asset is any asset that is cash, a contractual right to receive cash or another financial asset, or to exchange financial instruments with another enterprise under conditions that are potentially favourable or an equity instrument of another enterprise.

The Group's financial assets are defined as cash and deposits with banks, investments, loans and advances to customers, and accounts receivable which is included in other assets on the Consolidated Statement of Financial Position.

# Classification and measurement

The Group classifies its financial assets in the following measurement categories:

#### 1. Amortised cost

On initial recognition, a financial asset is measured at amortised cost if both of the following conditions are met: (a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

Financial assets classified at amortised cost are carried at the amount at which the asset was measured upon initial recognition, minus principal repayments, plus or minus the cumulative amortisation of any premium or discount, and minus any write-down for expected credit losses ("ECL").

#### 2. Fair value through profit or loss ("FVTPL")

A financial asset is measured at FVTPL if it does not meet the criteria to be measured at amortised cost or at fair value through other comprehensive income ("FVOCI").

The classification of financial assets is generally based on the business model under which the asset is held and its contractual cash flow characteristics as described below.

The classification and subsequent measurement of financial assets are determined by the Group's business model for managing the financial asset, and the cash flow characteristics of the financial asset.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### Business model assessment

A business model assessment is performed to determine how a portfolio of financial assets is managed to achieve the Group's business objectives. Judgment is used in determining the appropriate business model for a portfolio of financial assets. The three categories of business models are "hold to collect", "hold to collect and sell", and "other".

For the assessment of a business model, the Group takes into consideration the following factors:

- How the performance of assets in a portfolio is evaluated and reported to the Group's management;
- How compensation is determined for the Group's business lines' management that manages the assets:
- Whether the assets are held for trading purposes i.e., assets held within a business model and how those risks are managed; and
- The frequency and volume of sales in prior periods and expectations about future sales
  activity. Information about sales activity is not considered in isolation, but as part of an
  overall assessment of how the Group's stated objective for managing the financial assets is
  achieved and how cash flows are realised.

Financial assets that are not held to collect, or both held to collect, and sell are assessed at a portfolio level reflective of how the asset or group of assets are managed together to achieve a particular business model.

#### Contractual cash flow assessment

The contractual cash flow characteristics assessment involves assessing the contractual features of an instrument to determine if they give rise to cash flows that are consistent with basic credit arrangements. Contractual cash flows are consistent with basic credit arrangements if they represent cash flows that are solely payment of principal and interest on the principal amount outstanding.

In assessing whether the contractual cash flows are SPPI, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Group considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Group's claim to the cash flows from specified assets; and
- features that modify consideration of the time value of money.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Principal is defined as the fair value of the instrument at initial recognition. Principal may change over the life of the instrument due to repayments or amortisation of premiums/discounts. Interest is defined as the consideration for the time value of money and the credit risk associated with the principal amount outstanding and for other basic lending risks and costs (liquidity risk and administrative costs), and a profit margin.

If the Group identifies any contractual features that could significantly modify the cash flows of the instrument such that they are no longer consistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

With the exception of investments in equity securities, all financial instruments are classified at amortised cost at the reporting date. Investments in equity securities are classified at FVTPL.

# Initial Recognition

The Group initially recognises loans and advances to customers and deposits from customers on the date on which they are originated. All other financial instruments, (including regular-way purchases and sales of financial assets) are recognised on the trade date, which is the date on which the Group becomes a party to the contractual provisions of the instrument.

When a new financial asset is recognised, it will generally be recorded in Stage 1, unless it is credit-impaired on recognition.

#### Initial Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

#### Subsequent Measurement

Subsequent measurement of financial assets depends on the Group's business model for managing the asset and the cash flow characteristic of the asset. The two measurement categories are as noted above.

#### Reclassification

Financial assets are not reclassified after their initial recognition, except in the period after the Group changes its business model for managing financial assets.

#### **Modification**

The terms of a financial asset may be modified such that the contractual cash flows are changed. The treatment of a modification depends on the nature of the expected changes.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

If the cash flows are substantially different, the contractual rights to cash flows from the original asset are deemed to have expired. In this case, the original financial asset is derecognized and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of the eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

If cash flows are modified when the borrower is in financial difficulty, then the objective of the modification is usually to maximize recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Group plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place. The financial asset continues to be monitored for increases in credit risk and impairment.

If the modification of a financial asset measured at amortised cost does not result in derecognition of the financial asset, the gross carrying amount of the financial asset is recalculated using the original effective interest rate of the asset and the adjustment is recognised as a modification gain or loss in profit or loss.

#### Derecognition

Financial assets are de-recognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership. For loans and advances to customers, this generally occurs when borrowers repay their obligations, or the loans are sold or written off. Similarly, for investments this occurs when the investments mature and the contractual payments underlying the investments have been repaid to the Group, or when the investment is sold or written off.

If the Group has neither transferred nor retained substantially all the risks and rewards of ownership, an assessment is made whether the Group has retained control of the financial assets.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### Financial liabilities

Financial liabilities are any liabilities that are:

- Contractual obligations to deliver cash or another financial asset to another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Group:
- Contracts that will or may be settled in the Group's own equity instruments and are either a non-derivative for which the Group is or may be obliged to deliver a variable number of its own equity instruments, or a derivative that will or may be settled either by exchange of a fixed amount of cash or another financial asset for a fixed number of the Group's own equity instruments.

Financial liabilities are classified as either a) FVTPL or b) amortised cost.

Financial liabilities are classified as FVTPL where the financial liability is either held for trading or is designated as FVTPL. Financial liabilities at FVTPL are stated at fair value with any resulting gain or loss recognised in the Consolidated Statement of Profit or Loss and Other Comprehensive Income.

#### Initial Measurement

Financial liabilities classified at amortised cost are initially measured at fair value, net of transaction costs.

#### Subsequent Measurement

Subsequently measured at amortised cost using the effective interest method with interest expense recognised on an effective yield basis.

#### Derecognition

The Group's financial liabilities comprise deposits from customers, lease liabilities, and certain other liabilities, including accounts payable. Financial liabilities (or parts thereof) are derecognised when the liability has been extinguished and the obligation specified in the contract is discharged, cancelled, or expires.

All of the Group's financial liabilities are classified at amortised cost.

# (f) Impairment of financial assets measured at amortised cost

The Group recognises ECL on financial assets measured at amortised cost. ECL for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Impairment losses are measured at an amount equal to the 12-month ECL or lifetime ECL depending on the stage in which the asset is classified.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

12-month ECL are the portion of ECL that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). Lifetime ECL are the ECL that results from all possible default events over the maximum contractual period of exposure.

The maximum period considered when estimating ECL is the maximum contractual period over which the Group is exposed to credit risk.

ECL of financial assets is recognised in three stages:

Stage 1 – Performing financial assets are categorized as Stage 1 and an allowance is recognised based on default events expected to occur within the next 12 months. On subsequent reporting dates, 12-month ECL continues to apply where there is no significant increase in credit risk ("SICR") since initial recognition.

**Stage 2** – Performing financial assets are categorized as Stage 2 when there is a SICR since initial recognition but the financial asset is not credit-impaired. The Group recognises the full lifetime ECL on Stage 2 financial assets.

In determining whether a SICR has occurred since initial recognition, and when estimating ECL, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Group's historical experience and informed credit assessment and forward-looking information. Critical accounting judgments and key sources of estimates are discussed in Note 3.

The assessment of whether an asset is in stage 1 or 2 considers the relative change in the probability of default occurring over the expected life of the instrument, and is not assessed based on the change in the amount of the ECL. This involves setting quantitative tests combined with additional indicators such as credit risk classification and other observable inputs. Assets that are more than 30 days past due, but not credit-impaired, are classed as stage 2.

Changes in the expected credit loss, including the impact of movements between the first stage (12 month ECL) and the second stage (lifetime ECL), are recorded in profit or loss.

**Stage 3** - If one or more default events occur which are expected to have an adverse effect on the estimated future cash flows from the financial asset, the Group continues to recognise the full lifetime ECL. At this stage, the financial asset is credit-impaired and categorized as Stage 3.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The Group considers all financial assets, except for sovereign and government-related debt to be in credit-impaired when:

- The credit facility is 90 days or more past due;
- The borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group through actions such as realising security (if any held); and/or
- The borrower is on principal-only repayment terms.

IFRS 9 does not alter the Group's definition of default currently used to determine whether or not there is objective evidence of impairment of a financial asset.

The Group shall consider its investment in sovereign and government-related debt to have defaulted when payments or an obligation are not made on the agreed date due or when other relevant qualitative and quantitative information becomes available to the Bank, indicating that the sovereign and government-related debt will go into default on or before the reporting date, or within twelve months after the reporting date.

In the event the payment or an obligation due date falls on a non-business day, the instrument is deemed to have effectively defaulted where the payment or obligation is not met within three (3) business days of the due date.

Where payments or an obligation on sovereign and government-related debt is resumed, the default status is deemed cured where payments or obligations are met in full for at least one (1) year from the breach of the sovereign credit arrangement.

#### Measurement of ECL

Measurement of ECL is disclosed in Note 24.

#### Write-off of loans and advances to customer

Loans and advances to customers (and the related ECL) are normally written off, either partially or in full, when there is no realistic prospect of recovery of the principal amount and, for a collateralised loan, when the proceeds from realising the security have been received. Consumer loans are written-off in the month after principal and/or interest payments become 360 days contractually in arrears. Credit card loans are written-off in the month after principal and/or interest payments become 180 days contractually in arrears.

#### Recovery of previously written-off loans

Recoveries of principal and/or interest on previously written off loans are recognised in impairment losses on financial assets net in the Consolidated Statement of Profit or Loss and Other Comprehensive Income on a cash basis or when the loan is rewritten on normal terms prevailing at the time of the rewrite.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### Renegotiated loans

Loans subject to impairment assessment, whose terms have been renegotiated, are subject to ongoing review to determine whether they remain impaired or should be considered past due. The carrying amount of loans that have been classified as renegotiated retain this classification until maturity or derecognition.

# (g) Impairment of non-financial assets

At each reporting date, management reviews the carrying amount of non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss. The recoverable amount is the higher of fair value less costs to sell and value in use. An impairment loss is recognised as an expense immediately unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease to the extent that there is a revaluation surplus.

# (h) Cash and cash equivalents

For the purposes of the Consolidated Statement of Cash Flows, cash and cash equivalents comprise cash on hand and unrestricted deposits with banks that have original maturities of three months or less, including cash with the Central Bank, amounts due from banks, and short-term treasury bills. Cash and cash equivalents are carried at amortised costs on the Consolidated Statement of Financial Position.

#### (i) Investments

Investments in the Consolidated Statement of Financial Position include:

- debt investment securities measured at amortised cost less ECL. These are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortised cost using the effective interest method; and
- equity investment securities measured at FVTPL. These are measured at fair value with changes recognised immediately in the Consolidated Statement of Profit or Loss and Other Comprehensive Income.

#### (j) Loans and advances to customers

Loans and advances to customers in the Consolidated Statement of Financial Position include loans and advances measured at amortised cost which are initially measured at fair value, and subsequently at their amortised cost using the effective interest method.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### (k) Leases

#### Classification and measurement

The Group applies a single recognition and measurement approach for all leases, except for short-term leases (leases with terms of twelve months or less) and leases of low-value assets. Lease contracts are typically made for a fixed period with an extension option which is exercisable by the Group. A lease of low-value assets, on the other hand, is a lease for which an underlying asset is of low value (per the standard, with a value of \$5,000 or the equivalent for new similar assets).

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand- alone prices. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.

The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Leases are recognized as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group.

#### Short-term leases and leases of low value assets

The Group has elected not to recognise right of use assets and lease liabilities of assets that have a lease term of 12 months or less and leases of low-valued assets. The Group recognises the lease payment associated with leases as an expense on a straight-line basis over the lease term.

#### Initial measurement

#### 1. Lease liabilities

Lease liabilities are initially measured as the present value (PV) of the lease payments not paid. The PV is determined by using the interest rate implicit in the lease. If that rate cannot be readily determined, the Group's incremental borrowing rate is used. This rate is defined as the rate of interest that the Group would have to pay to borrow over a similar term and with similar security to obtain an asset of a similar value to the right-to-use asset in a similar economic environment.

#### 2. Right of use assets

Right of use assets are measured at cost comprising the following:

- The amount of the initial measurement of the lease liability;
- Any lease payments made at or before the commencement date less any incentives received;
- Any initial direct costs; and
- Restoration costs.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

# Subsequent Measurement

#### 1. Lease liabilities

Lease payments are allocated between principal and finance costs. The finance cost is charged to the Consolidated Statement of Profit or Loss and Other Comprehensive Income over the lease period to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Accordingly, the lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount by the lease payments made.

#### 2. Right of use assets

Right of use assets are depreciated using the straight-line method over the shorter period of the lease term and the useful life of the underlying asset. The Group defines the lease term as the period of time in which a contractual lease is in place. The Group assesses whether there is an indication of impairment for the right-of-use asset in accordance with IAS 36, *Impairment of Assets*. In the event of impairment, a test is performed. Judgments applied by the Group in determining the measurement of its lease liabilities and right-of-use assets are disclosed in Note 11.

#### (l) Premises and equipment

Premises and equipment are carried at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of an item. Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All repairs and maintenance costs are charged to the Consolidated Statement of Profit or Loss and Other Comprehensive Income as a part of total profit during the financial period in which they are incurred.

Land is not depreciated.

Depreciation on other premises and equipment assets are computed on a straight-line basis, net of residual values, and are charged to profit or loss over their estimated useful lives as follows:

Site improvements - 5 - 10 years

Buildings - The shorter of the estimated useful life or a maximum of 40 years Leasehold improvements -The shorter of the estimated useful life or the lease term Furniture, fittings and equipment - 3-10 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Gains or losses arising from the disposal or retirement of an item of premises and equipment are determined as the difference between the sales proceeds and the carrying amount of the asset. Such gains or losses are recognised in the Consolidated Statement of Profit or Loss and Other Comprehensive Income.

#### (m) Deposits from customers

Deposits from customers are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. Deposits from customers are derecognised when the financial liability has been extinguished.

#### (n) Life insurance fund liability

Laurentide Insurance and Mortgage Company Limited ("Laurentide") calculates its actuarial liabilities for individual life insurance policies using the Canadian Policy Premium Method. The calculation of these policy reserves is based on assumptions as to future rates for mortality and morbidity, investment yields, policy lapse and expenses, which contain margins for adverse deviations. Changes in the liability are estimated with the assistance of an independent actuary and charged to the Consolidated Statement of Profit or Loss and Other Comprehensive Income.

#### (o) Offsetting

Financial assets and financial liabilities are offset and the net amount reported in the Consolidated Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

Income and expenses are presented on a net basis only when permitted under IFRS, or for gains and losses arising from a group of similar transactions.

#### (p) Recognition of income and expense

*Interest income and interest expense* 

The Group recognizes interest income and interest expense in the Consolidated Statement of Profit or Loss and Other Comprehensive Income for all financial instruments measured at amortised cost using the effective interest method described below, except for financial assets that have subsequently become credit-impaired ('Stage 3' financial assets). For these Stage 3 financial assets, interest income is calculated using the method for non-performing loans as described below.

Loan origination fees for loans are deferred (together with related direct costs) and recognized as an adjustment to the effective interest rate on the loans as they are an integral part of the loan. The adjustment to the effective interest rate has been determined by using the estimated terms of loans to maturity or repayment, if earlier.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, where appropriate, a shorter period to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

In accordance with local regulatory guidelines, a loan is classified as non-performing when payment is contractually 90 days in arrears, or the total amount outstanding outside of contractual arrangements is equal to at least 90 days' worth of payments. When a loan is classified as non-performing, recognition of interest ceases, and interest 90 days in arrears is reversed from income. Loans are generally returned to performing status when the timely collection of both principal and interest is reasonably assured and all delinquent principal and interest payments are brought current.

When a loan is granted forbearance, the contractual repayments of principal and interest are deferred until the end of the forbearance period. However, irrespective of the suspension of payment the recognition of interest continues during the forbearance period.

The Bank continues to accrue interest to income on loans specifically assessed as non-performing and where the estimated net realizable value of the security held, where applicable, is sufficient to recover the payment of outstanding principal and accrued interest.

#### Credit life insurance premiums

Credit life insurance premium income is recognized at the time a policy comes into effect. Premiums are shown net of refunds. Policies written before 2017 were paid in full at the origination of the contract for the term of the contract. The maximum term of any contract is 72 months. For these policies, the contract amount is recognized as premium income with an associated expense being recognized relative to the life insurance fund liability. Refunds on insurance contracts that have not yet expired are allowed on early withdrawal using the "Rule of 78". The Rule of 78 is a method of calculating how much pre-calculated interest a lender refunds to a borrower who pays off a loan early. Premiums for policies written in 2017 and subsequent years are assessed monthly and are calculated on the current balance of the associated loan. Such premiums are recognized when assessed.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### Fee income

Fee income comprises amounts earned from the ancillary services the Group provides primarily in connection with its offering of loans and advances to customers, and bank deposit services. Fees generated for services performed for the customer over a period of time are recognized over the service period on a straight-line basis. Other fees are recognized at a point in time when the Group satisfies its performance obligation, usually upon execution of the underlying transaction, which is generally at the time the customer's account is charged.

# Other income and expenses

Other income relates mainly to other service charges, rental income and foreign exchange. Service charges are recognised as the services are rendered. Rental income is recognised on a straight-line basis over the term of the lease. Insurance claims are recognized when incurred. Other expenses are recognised as the services are received.

# (q) Foreign currency translation

#### Functional and presentation currency

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the Group operates (the functional currency). The consolidated financial statements are presented in Bahamian dollars, which is the Group's functional and presentation currency.

#### *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the rates of exchange prevailing at the dates of the transactions.

Foreign exchange gains and losses resulting from the settlement of such transactions and the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Consolidated Statement of Profit or Loss and Other Comprehensive Income as a part of total profit. Translation differences on monetary financial assets measured at FVTPL are included as part of the fair value gains and losses.

#### (r) Dividends on common shares

Dividends on common shares are deemed declared and recognised as a deduction from equity in the period in which the dividends are approved by the Board and receive the applicable regulatory approvals.

# (s) Earnings per common share

Earnings per share are computed by dividing the total profit by the weighted average number of common shares outstanding during the year and not held by Group companies.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### (t) Retirement benefit costs

The Bank maintains defined benefit ("DB Provisions") and defined contribution ("DC Provisions") pension plans (together referred to as "the plans") covering all of its employees. Assets of the plans are administered by, and under the control of, independent trustees.

The Pension Committee is responsible for advising the Board of Directors in fulfilling its fiduciary and oversight duties for the Bank's pension arrangements. As a part of this responsibility, members of the committee review the performance of the trustees, administrator and investment manager in accordance with the trust deed, plan rules and investment policy statement, as well as providing support and making recommendations, as appropriate. The Pension Committee comprises members of the Bank's Board of Directors, one management employee and one non-management employee elected by the employees triennially.

The Bank's contributions under the defined contribution pension plan are recognised as staff costs in general and administrative expenses.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method, with actuarial valuations being carried out at each reporting date. The defined benefit obligation is calculated annually by independent actuaries. The asset or liability amount recognised in the Consolidated Statement of Financial Position represents the present value of the defined benefit obligation and the current service cost at the end of the reporting period less the fair value of plan assets.

Pension costs under the DB Provisions include the present value of the current year service cost based on estimated final salaries, interest on obligations less interest on assets, and estimated administrative costs. Current service cost and net interest on the net defined benefit asset or liability are charged to general and administrative expenses.

Changes in the net defined benefit asset or liability recorded in other comprehensive income include actuarial gains and losses on obligations, and assets arising from experience different than assumed and changes in assumptions.

#### (u) Short-Term Benefits

Short-Term Benefits are employee benefits to be settled wholly before twelve months after the end of the annual reporting period in which the employee renders the related services and is recorded as the services are rendered.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### (v) Share-Based Payments

# Equity-settled share-based payments

The Bank issues equity-settled share-based payments to certain management staff. The Bank determines the fair value of stock options on their grant date using the Black Scholes Model and records this amount as compensation expense. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions and behavioural considerations. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period. When the stock options are exercised the proceeds are recorded in share capital and share premium.

#### Other Stock-Based Compensation Plan

The Bank offers non-management staff the option of purchasing common shares at a 10% discount from the prevailing market rate at the time of the offer.

The amount of discount is recorded as compensation expense with a corresponding increase to share premium. Payments by staff for the shares are credited to share capital and share premium.

#### (w) Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs. Ordinary shares, and preference shares whose terms do not create contractual obligations, are classified as equity (Note 16).

#### Treasury shares

Treasury shares represents the Bank's issued shares that have been repurchased by the Bank. Treasury shares are deducted from equity and no gain or loss is recognised on the purchase, sale, issue or cancellation of treasury shares. Any premium or discount to par value is shown as an adjustment to share premium.

#### (x) Other items

# 1. Financial guarantees and loan commitments

Financial guarantee contracts require the Group to make payments to reimburse the holder for a loss it incurs if a debtor does not make a payment in accordance with the terms of the debt agreement. Financial guarantees are recognised in the Consolidated Statement of Financial Position at the higher of the fair value of the fees originally received less cumulative amortization recognised in the consolidated statement of profit or loss, and the expected credit loss, as documented below.

Loan commitments are undrawn firm commitments to provide credit under pre-specified terms and conditions.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The nominal value of the financial guarantees and loan commitments are not recognised in the Consolidated Statement of Financial Position. Both financial guarantees and loan commitments are subject to an allowance for expected credit losses and subject to the same impairment considerations as documented in Note 2(f). Where a financial instrument includes both a loan and a loan commitment component, the loss allowance on the loan commitment is recognised together with the loss allowance for the loan. Where a financial instrument does not include both a loan and a loan commitment component, the loss allowance is recognised as a provision.

# 2. Related parties

A related party is a person or entity that is related to the reporting entity:

- i. A person or close member of that person's family is related to a reporting entity if the person:
  - a. has control or joint control of the Group
  - b. has significant influence over the Group;
  - c. is a close family member of an individual or those family members who may be expected to influence, or be influenced by, that individual in their dealings with the Group; or
  - d. is a member of the Group's key management personnel, including directors.
- ii. An entity is related to the Group if any of the following conditions exist:
- a. An entity is a member of the Group;
- b. An entity is associated with, or is a joint venture partner with the Group;
- c. An entity is a post-employment benefit plan for the benefit of employees of the Group;
- d. An entity can control or exercise significant influence over the Group in making financial or operational decisions; and
- e. An entity is jointly controlled or significantly influenced by parties described in i) above.

A related party transaction is a transfer of resources, services or obligations between the Group and a related party. Transactions with related parties are disclosed in Note 21.

#### 3. Liability Provisions

Provisions for restructuring costs and legal claims are recognised when the Group has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated.

#### 4. Taxation

Life insurance premium tax is incurred at the rate of 3% of premiums written by the Group's insurance company, and recognised as an expense at the time that premiums are written and included in general and administrative expenses.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Effective January 1, 2022, value-added tax was decreased from 12% to 10%. The Group is required to pay value-added tax at a rate of 10% on goods and services as prescribed by the Value Added Tax Act. The Group also pays business licence fees in accordance with the Business Licence Act, real property tax in accordance with the Real Property Tax Act and stamp duty.

There is no other income, capital gains or corporate taxes imposed. The Group's operations do not subject it to taxation in any other jurisdiction.

# 5. Business Segments

Operating segments are reported in a manner consistent with the internal reporting provided to the Executive Committee which is responsible for allocating resources to the reportable segments and assessing their performance. Income and expenses directly associated with each segment are included in determining operating segment performance. The Group has five operating segments which are organised based on the nature of the products and services provided by each segment.

- i. Retail banking the provision of full-service personal banking including the acceptance of savings, fixed and demand deposits, providing consumer financing through loans, overdrafts and credit cards and mortgage financing on real estate and the sale of foreign exchange.
- ii. Credit life insurance the provision of credit life insurance in respect of the Bank's borrowers through Laurentide.
- iii. Real estate holdings ownership and management of real property which is rented to branches and departments of the Bank through C.B. Holding Co. Ltd.
- iv. Investment holdings holdings of investments in the Bank's common shares through C.B. Securities Ltd.
- v. Insurance agency operations provision of insurance agency services to the Group's insurance company, its sole client through Laurentide Insurance Agency Limited.

The entities within the Group operate within the same geographical area. Non-Bahamian dollar assets and liabilities are not material and are therefore not allocated to business segments.

Inter-segment revenues are charged at competitive market prices. Inter-segment expenses are transferred at cost. All transactions between segments are eliminated on consolidation.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

There are no other operations that constitute separate reportable segments. The segment operations are all financial, and principal revenues are derived from interest and fee income. No single-customer contributed 10% or more of the Group's total income for the periods covered in the consolidated financial statements.

# 3. Critical Accounting Judgements and Key Sources of Estimation Uncertainty

The following are critical estimates and key judgments that management has made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

# 1. Impairment of financial assets

The impairment losses on financial assets represent management's estimate of ECL.

The measurement of the ECL allowance on financial assets is an area that requires the use of complex models and significant assumptions about the future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses).

ECL is defined as the weighted expected probable value of the discounted credit loss (on principal and interest) determined by evaluating a range of possible outcomes and future economic conditions. It represents the present value of the difference between the contractual cash flows and the expected cash flows.

The process for determining the allowance involves significant quantitative and qualitative assessments. Particularly, a number of significant judgments are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for a significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL;
- Assessing the risk rating and impaired status of loans;
- Determining the additional risk, if any, related to loans granted forbearance;
- Estimating cash flows and realisable collateral values;
- Developing default and loss rates based on historical data;
- Estimating the impact on historical data by changes in policies, processes and credit strategies;
- Assessing the current credit quality based on credit quality trends; and
- Determining the current position in the economic cycle.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The Group has developed an internal risk grade rating system, that indicates the credit risk on an individual basis for loans and advances to customers and investments carried at amortized cost. The internal risk grades consider a number of qualitative and quantitative factors, considering internal information and external circumstances impacting the borrower, or in the case of investments, of the issuer. The internal risk grades are a primary input into the determination of the probability of default for exposures.

IFRS 9 requires the use of forward-looking information including reasonable and supportable forecasts of future economic conditions. The requirement to consider a range of economic scenarios and their possible impacts on impairment allowances is a subjective feature of the IFRS 9 ECL model. The Group continues to develop its capability to model a number of economic scenarios and capture the impact on credit losses to ensure the overall ECL represents a reasonable distribution of economic outcomes. To this end, the Bank considers the impact of various economic scenarios by segmenting its exposures subject to IFRS 9's impairment requirements into forborne and non-forborne categories.

In its ECL model, the Bank relies on a broad range of forward-looking information such as economic inputs, including:

- GDP growth of The Bahamas
- Unemployment rates of The Bahamas
- Inflation rates of The Bahamas

Limitations in the Bank's IFRS 9 ECL model have previously been identified through the ongoing assessment and validation of the output of the model. In these circumstances, management makes appropriate adjustments to the Bank's allowance for impairment losses to ensure the overall provision adequately reflects all material risks. Refer to note 24 for additional disclosures related such risks.

# Post-retirement benefit obligation

The Bank maintains a defined benefit plan as outlined in Note 2(t). Due to the long-term nature of pension plans, the calculation of benefit expenses and obligations depends on various assumptions such as discount rates, expected rates of return on assets, projected salary increases, retirement age, mortality and termination rates. Any difference between the actual experiences and actuarial assumptions will affect the benefit obligation and expense.

The inputs, assumptions and estimation techniques used in measuring the defined benefit obligation are detailed in Note 22.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### 2. Life insurance fund liability

The inputs, assumptions and estimation techniques used in measuring the life insurance liability are detailed in Note 14.

# 3. Classification of financial assets

On an annual basis, management assesses the business models within which the financial assets are held. The assessment is made as to whether the contractual terms of a financial asset are solely payment of principal and interest ("SPPI") on the principal amount outstanding.

The assessment considerations are detailed in Note 2(e).

#### *4.* Fair value of financial instruments

IFRS 13 requires that the classification of financial instruments at fair value be determined by reference to the source of inputs used to derive the fair value. This classification uses the following three-level hierarchy:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 - Valuation techniques based on observable inputs, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3 - Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The best evidence of fair value is quoted price in an active market. In most cases, the Group's financial instruments are not typically traded on an open market, and therefore management applies judgment to determine their fair value.

Refer to note 8 for more information about the classification of fair values.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The following methods and assumptions have been used in determining fair value:

- Cash and deposit with banks The fair values of these financial instruments are assumed to approximate their carrying values due to their generally short-term nature or the repricing of interest rates on variable rate products.
- Investments The estimated fair value of the Group's investments was determined based on their market bid price values.
- Loans and advances to customers The estimated fair value of loans and advances to customers was determined by valuing the receivables based on current market interest rates relative to the Group's interest rates. The carrying values of these financial instruments approximates their fair values.
- Deposits from customers The estimated fair value of deposits from customers was determined by valuing the deposits based on current market interest rates relative to the Group's interest rates. The fair values of deposits from customers approximate their carrying values.
- Other financial instruments Due to their short-term maturity, the carrying values of these financial instruments approximate their fair values.

Since the calculation of fair value is based on management's estimates, which involve uncertainties, the actual fair value realised in a sale or immediate settlement of the instruments may differ from the estimated amount.

Country of

#### 4. Subsidiaries

The Group has interests in the following entities:

Country of	
Incorporation	Shareholding
Bahamas	100%
	Incorporation Bahamas Bahamas Bahamas

Notes to Consolidated Financial Statements

The entities within the Group operate within the same geographical area.

Non-Bahamian dollar assets and liabilities which are not in the retail bank segment are not material and are therefore not allocated to business segments.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

## 7. Cash and Cash Equivalents

	2022	2021
Cash on hand	\$ 23,220	\$ 23,890
Deposits with banks	13,806	18,012
Balances with The Central Bank of The Bahamas	 227,197	 150,556
	264,223	192,458
Minimum reserve requirement	 (59,000)	 (57,326)
Cash and cash equivalents	\$ 205,223	\$ 135,132

The minimum reserve requirement comprises deposits placed with the Central Bank to meet statutory requirements of the Bank's licenses and are not available for use in the Bank's day-to-day operations. As such, these amounts are excluded from balances held with the Central Bank to arrive at cash and cash equivalents. All balances with the Central Bank are non-interest bearing. Cash and deposit balances disclosed above are recoverable within one year.

The financial assets included in cash and cash equivalents are carried at amortized cost, which approximates the fair market value.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The table below shows the fair value hierarchy of investments.

	2022						2021					
		Level 1		Level 2		Level 3		Level 1		Level 2	Le	vel 3
Bahamas Government Bahamian dollar debt	\$	-	\$	607,149	\$	-	\$	-	\$	668,696	\$	-
Bahamas Government related-debt		-		18,214		-		-		18,232		-
United States Government debt		1,036		-		-		1,149		-		-
Equity investments		8,672		-		-		8,043		-		-
United States treasury bills		64,167		-		-		-		-		-
Bahamas Government United States dollar debt		-		25,248		-		-		_		-

As of December 31, 2022 the majority of the Group's investments in Bahamas Government debt, comprise Bahamas Government Registered Stock and Bahamas Government Treasury Bills.

Other investments include Bahamas Government-related debt such as securities issued by the Bahamas Mortgage Corporation, The University of The Bahamas, The Bridge Authority and The Clifton Heritage. There is not a very active market for these investments. Primary brokers of these Government-related debt trade similar instruments at par value.

As at December 31, 2022, the Group held equity securities as FVTPL totaling \$8.67 million (2021: \$8.04 million). The Group's common share holdings in MasterCard Incorporated account for the majority of its equity investments. These shares are carried at fair value with any resulting gains or losses recorded in the Consolidated Statement of Profit or Loss and Other Comprehensive Income. During 2022 the Group's Mastercard share holdings were converted from class B shares to class A shares. The conversion from class B to class A shares resulted in an increase in unrealised gains of \$867 thousand at the time of conversion due to the elimination of an illiquidity premium attached to the class B shares.

Notes to Consolidated Financial Statements

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

## 9. Loans and Advances to Customers, net

Loans and advances to customers are as follows:

	2022	2021
Residential mortgage	\$ 161,186	\$ 168,318
Business	22,635	20,968
Personal	615,176	636,273
Credit card	34,334	34,738
Government	 28,895	39,116
	862,226	899,413
Less: Allowance for ECL	 (75,981)	(131,872)
Loans and advances to customers, net	\$ 786,245	\$ 767,541

Loans and advances to customer categorized by maturity are as follows:

	2022	2021
Current (due within one year)	\$ 128,211	\$ 61,192
Non-current (due after one year)	 658,034	706,349
	\$ 786,245	\$ 767,541

Included within the carrying amount of gross loans and advances to customers are accrued interest and late fees amounting to \$10.6 million (2021: \$14.1 million), and effective interest rate adjustments of \$4.6 million (2021: \$3.4 million), the latter principally comprising deferred fees and other direct costs incurred to originate loans.

The effective interest rate yield earned for the year ended December 31, 2022, is 11.67% (2021: 11.91%). Interest rates on loans outstanding at December 31, 2022 and 2021 range from 2% - 16.25% per annum.

Loans and advances to customers are classified as Level 3 financial instruments.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Total	\$ 116,580	\$ (88,212)	\$ 9,557	\$ 93,947	\$ 131,872

### 10. Other Assets

The composition of other assets is as follows:

	2022	2021
Net defined benefit asset	\$ 4,672	\$ 4,005
Prepaid expenses	1,923	2,543
Accounts receivable	67	2,502
Other	 1,323	 630
	\$ 7,985	\$ 9,680

The pension asset comprises the net asset position of the defined benefit plan as disclosed in Note 22. The net pension asset is not expected to be recovered within one year. All other assets are expected to be recovered within one year.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

## 11. Right of Use Assets and Lease Liabilities

The right of use assets are as follows:

	2022	2021
Opening net book value	\$ 1,301	\$ 1,935
Net Additions	467	27
Depreciation	 (586)	 (661)
Closing net book value	\$ 1,182	\$ 1,301
	2022	2021
Cost	\$ 2,346	\$ 1,962
Accumulated depreciation	 (1,164)	 (661)
Closing net book value	\$ 1,182	\$ 1,301
_		

For the years ended December 31, 2022, and 2021, there were no direct costs incurred by the Group upon entering a lease.

The lease liabilities are as follows:

	2022	2021
Opening book value	\$ 1,369 \$	1,935
Additions	460	27
Finance cost on lease liabilities	51	149
Repayment of lease liabilities	 (638)	(742)
Closing book value	\$ 1,242	3 1,369
Of which is:		
	2022	2021
Current lease liabilities	\$ 700 \$	555
Non-current lease liabilities	542	814
	\$ 1,242 \$	1,369

The incremental borrowing rate is 4.25% (2021: 4.25%) per annum.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

## 12. Premises and Equipment

The movement of premises and equipment are as follows:

		Land/Site				Leasehold provement	Furniture Fittings &	
	Imp	provements	E	Buildings	ı	S	Equipment	Total
Cost								
December 31, 2021	\$	14,975	\$	38,954	\$	1,095	\$ 40,131	\$ 95,155
Additions				75			1,137	1,212
Disposals							(537)	(537)

Depreciation		49		975		28	2,551	3,603
Disposal							(418)	(418)
December 31, 2022	\$	844	\$	14,813	\$	968	\$ 34,647	\$ 51,272
Net Book Value	·							_
December 31, 2021	\$	14,180	\$	25,116	\$	155	\$ 7,617	\$ 47,068
December 31, 2022	\$	14,131	\$	24,216	\$	127	\$ 6,084	\$ 44,558

## 13. Deposits from Customers

The composition of deposits from customers is as follows:

		2022		2021
Demand deposits	\$	269,426	\$	243,578
Savings accounts		509,072		475,571
Certificates of deposit		734,899		743,069
	\$	1,513,397	\$ 1	1,462,218
Denosits from customers categories	orized by mat	turity are as fo	2110	xx7•

Deposits from customers categorized by maturity are as follow:

Current (due within one year)	\$ 1,036,096	\$ 1,118,451
Non-current (due after one year)	 477,301	343,767
	\$ 1,513,397	\$ 1,462,218

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Management has determined that the fair value of deposits from customers approximates their carrying values.

Included in deposits from customers is accrued interest payable to customers totaling \$35.4 million (2021 : \$32.7 million).

Deposits from customers are classified as Level 3 financial instruments.

Deposits carry fixed interest rates ranging from 0.00% to 6.25% (2021: 0:00% to 6.25%) per annum, but the fixed interest rates are determined based on market rates and can be adjusted at the respective maturities of the deposits based on changes in market rates. The weighted average interest rate incurred on deposits from customers as at December 31, 2022, was 1.16% (2021: 1.20%).

## 14. Life Insurance Fund Liability

The Group provides credit life insurance in respect of certain of its borrowers through Laurentide.

The life insurance fund liability in respect of credit life insurance contracts is calculated as:

- i. The sum of the present value of expected future death claims, withdrawal claims and administrative expenses for single premium contracts, and
- ii. The sum of the present value of expected future death claims, withdrawal claims, commissions and administrative expenses, less expected future monthly premiums, for monthly premium contracts.

An actuarial valuation of the life insurance fund liability was conducted as at December 31, 2022, by Oliver Wyman of Toronto, Canada. The valuation included a provision of \$292 thousand (2021: \$509 thousand) for claims incurred but not yet reported.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The movement in the life insurance fund liability is as follows:

	2022	2021
Balance at beginning of the year	\$ 1,011	\$ 1,012
Change in assumptions	32	44
Termination policies	(280)	(267)
Impact of aging	4	(107)
Change in IBNR	(218)	345
New business	23	10
Change in unearned premium res	 9	 (26)
Net change in insurance reserve	 (430)	 (1)
Balance at end of the year	\$ 581	\$ 1,011

Balances at the end of the year are expected to be settled as follows:

Current (within one year)	342	\$ 595
Non-current (after one year)	 239	 416
•	\$ 581	\$ 1,011

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

## Actuarial Assumption Sensitivities

The table below, with amounts stated as actual amounts, provides the impact of a 10% change in assumptions on mortality rates, policy lapse rates, loan interest rates, expenses and inflation:

									В\$	%

Management engaged an independent actuary to assist in determining the assumptions used. Management compares the assumptions recommended by the actuary to the Bank's historical experience and other internal and external data when assessing the reasonableness of the assumptions recommended by the actuary.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

### 15. Other Liabilities

The composition of other liabilities is as follows:

	2022	2021
Accruals and accounts payable	\$ 5,516	\$ 3,301
Cashier's cheques outstanding	5,674	3,713
Employee related	6,647	567
Other	 12,378	6,235
	\$ 30,215	\$13,816

Accruals and accounts payable and Cashier's cheques outstanding are expected to be settled within the next 12 months. The "other" category in the table above is comprised of insurance and taxes payable and other miscellaneous liabilities.

## 16. Share Capital

The table below presents information about the common shares which were authorized, issued, and fully paid during 2022 and 2021:

2021
\$ 4,500
\$ 1,968
26,363
(14,718)
\$ 13,613
\$ 1,946
11,667
\$ 13,613

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The holdings of treasury shares are to fund the Group's stock-based compensation plans and inject liquidity into the local market.

During the year, the Group had sales of its treasury shares and repurchased its common shares through its subsidiary, C.B. Securities. Details of the purchases are disclosed in Note 21.

During 2022 and 2021, the Group paid four quarterly common share dividends. In the first and second quarters of 2022, the Group paid \$0.01 per share in quarterly dividends. In the third and fourth quarters of 2022, the Group paid \$0.02 per share in quarterly dividends. In 2022 the Group also paid extraordinary dividends of \$0.04 per share.

These payments totaled \$29.27 million (2021: \$11.58 million) in common share dividend payments.

## 17. Earnings Per Share

	2022	2021
Total profit/(loss) available to common shareholders	\$ 75,921	\$ (30,007)
Weighted average number of common shares (in thousands)	292,613	289,335
Earnings/(loss) per share (expressed in dollars)	\$ 0.26	\$ (0.10)

## 18. Employee share-based Payment Plans

### Stock Option Plan

On May 16, 2007, the shareholders approved an employee stock option plan (the "Plan") of 2 million shares for designated officers and management staff. The number of shares included in the Plan is amended each time there is a stock split. Currently, there are 18 million shares approved under the Plan.

The main details of the Plan are as follows:

- a. Options will be granted annually to participants at the prevailing market price on the date of the grant.
- b. Options vest on a straight-line basis over three years.
- c. Vested options expire one year after the date of vesting.
- d. Options may only be exercised while in the employment of the Bank or subsidiary or affiliated companies unless otherwise approved by the Board.
- e. Exercised options are subject to a six-month restriction period before they can be transferred by the participant.
- f. Unless otherwise terminated by the Board, the Plan shall continue until the pool of common shares has been exhausted.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The Plan is being funded by CB Securities Ltd. purchasing shares from the market in advance of the options being exercised. The Bank did not recognize any expenses related to this equity- settled share-based payment plan during 2022 or 2021.

### Other share-based payment plans

Under the Bank's employee share purchase plan, non-management staff may purchase the Bank's shares at 90% of the closing market price on the date of grant for a restricted period each year. Employees' ability to purchase shares is restricted to a percentage of their salary according to their position. Shares so purchased vest immediately but are released to the employee on payment for the shares. No shares were made available under this plan in 2022 and 2021.

Shares to be exercised under the stock option plans as at December 31, 2022 are Nil (2021: Nil). Options available to be granted under the plans totaled 14,034,000 as of December 31, 2022, and 2021.

### 19. Fees and Other Income

Fees and other income derived from contracts with customers are as follows:

2022		2021
\$ 6,308	\$	5,773
6,838		6,324
5,902		4,937
3,393		2,927
 2,106		471
\$ 24,547	\$	20,432
\$	\$ 6,308 6,838 5,902 3,393 2,106	\$ 6,308 \$ 6,838 5,902 3,393 2,106

## 20. General and Administrative Expenses

General and administrative expenses are as follows:

	2022	2021
Staff costs	\$ 44,620	\$ 35,340
Licenses and taxes (including premium taxes)	12,152	12,205
Professional and service fees	8,210	7,424
Occupancy	4,781	4,055
Advertising	864	1,187
Other	7,203	7,583
	\$ 77,830	\$ 67,794

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Staff costs include pension costs of \$1.71 million (2021: \$2.2 million) of which \$0.1 million (2021: \$0.5 million) relates to the DB Provisions (see Note 22). Occupancy includes rental costs for leased properties (see Note 23). Other general and administrative expenses comprise primarily of bank licensing fees, technology licensing fees and profession services fees.

### 21. Related Parties Balances and Transactions

The following table shows balances and transactions with related parties not disclosed elsewhere in these consolidated financial statements:

		2022			2021	
	Key	Other		Key	Other	
	Management	Related		Management	Related	
	Personnel	Parties	Total	Personnel	Parties	Total
	\$	\$	\$	\$	\$	\$
Loans and advances to customers	3,319	553	3,872	3,370	61	3,431
Deposits from customers	8,455	310,775	319,230	28,907	271,176	300,083
Other liabilities	-	43	43	-	102	102
Interest income	130	32	162	126	8	134
Interest expense	210	8,624	8,834	661	9,434	10,095
General and administrative expense	-	540	540	-	354	354
Commitments under revolving credit lines	163	977	1,140	541	473	1,014

Amounts included in loans and advances to customers that relate to residential mortgages and business loans are secured. Amounts related to personal loans and credit cards are unsecured. Loans and advances to customers are granted at preferential interest rates which fall within the range disclosed in Note 9. Allowances for ECL in respect of these balances are not material. Deposits from customers are granted at preferential interest rates which fall within the range disclosed in Note 13.

### Compensation of Key Management Personnel

The remuneration of Directors and other members of key management personnel, those persons having the authority and responsibility for planning, directing and controlling the activities of the Bank, in addition to Directors' fees disclosed in the consolidated statement of profit or loss and other comprehensive income is as follows:

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

	2022	2021
Short term benefits	\$ 5,659	\$ 4,920
Post employment benefits	\$ 632	\$ 1,891
Other long term benefits	\$ 617	\$ 644
	\$ 6,908	\$ 7,455

### Purchases and Sale of Shares from and to Subsidiary

During the year, the Bank's wholly-owned subsidiary C.B. Securities Ltd. purchased 327,304 of the Bank's common shares for \$1.19 million (2021: shares 89,884 or \$0.3 million). C.B. Securities Ltd. holds 2,624,094 (2021: 3,425,169) of the Bank's shares which have a market value of approximately \$9.4 million (2021: \$13.6 million).

During 2022, 1,127,819 shares (2021: 4,188,919) were sold to an unconsolidated related party for \$3 million (2021: \$11 million) to facilitate dividend payments.

### 22. Bank Pension Scheme

The pension plan consists of the Defined Benefit Provisions ("DB Provisions") and Defined Contribution Provisions ("DC Provisions").

#### **DB** Provisions

The DB Provisions, which is closed to new members, provides pensions based on years of service, contributions and weighted average earnings at retirement. The Bank's funding policy is to make monthly contributions to the DB Provisions based on triennial valuations. The Bank pays on demand to the DB Provisions such periodic contributions as may be required to meet the obligations of the DB Provisions.

All employees in active employment of the Bank who had at least 3 years of service or had reached the age of 25, and who met the eligibility requirements were eligible for the DB Provisions. After October 1, 2013, entry to the DB Provisions was closed to all employees.

## **Assumptions applied to DB Provisions**

Discount rate:

In accordance with IAS 19, the discount rate used is determined by reference to market yields at the end of the reporting period on high-quality local corporate bonds, or where there is no deep market in such bonds, by reference to market yields on long-term Bahamas Government bonds. Currencies and terms of bond yields used must be consistent with the currency and estimated term of the post-employment benefit obligations being discounted.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

As at the reporting date, the discount rate assumption for the DB Provisions plan is 5.75% (2021: 5.75%).

### *Increases in pensionable earnings:*

The DB Provisions sets the pension increase rate assumption in line with the expected general wage growth which is influenced by the inflation by which benefits are expected to increase in future years. Although influenced by the inflation rate, the DB Provision does not contractually state that increases will be in line with market inflation. The assumption for 2022 has remained unchanged at 1%.

### Mortality:

The DB Provisions use the 1994 Uninsured Pensioners Mortality Table (UP-94) to determine the mortality rate of the plan members. The UP-94 mortality table was considered appropriate for expected mortality during 1994, however, the actual experience in the DB Provisions has proven too scarce to produce any credible experience. In instances where the actual experience is not credible, the use of UP-94 is generally accepted.

The Bank has considered the impact of COVID-19 on the mortality assumption and has deemed it unnecessary to alter its long-term assumptions.

Rate of increase of future compensation:

The 'rate of increase in future compensation' assumption of 3.5% remains unchanged from the prior year.

### Expenses:

The expense assumption used in the calculation of the DB Provisions is \$102,000 (2021: \$102,283). The assumption is based on the average amount of the investment and administrative expenses in the DB Provisions over the past several years.

The DB Provisions typically expose the Bank to the following actuarial risks:

- i. Investment risk: The DB Provisions comprises investments in Bahamian Government (and Government-related) securities and private securities. The present value of the DB Provisions liability is calculated using a discount rate of 5.75% (2021: 5.75%). If the return on assets is below the discount rate, it will create a deficit.
- ii. Interest risk: A decrease in the discount rate will increase the DB Provisions liability.
- iii. Longevity risk: The present value of the DB Provisions liability is calculated by reference to the best estimate of the mortality of participants both during and after their employment. An increase in the life expectancy of the DB Provisions participants will increase the DB Provisions' liability.
- iv. Salary risk: The present value of the DB Provisions liability is calculated by reference to the future salaries of participants. As such, an increase in the salary of the participants will increase the DB Provisions' liability.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

An actuarial valuation of the DB Provisions was undertaken by Mercer (Canada) Limited, Toronto, Canada as at December 31, 2022.

The following tables present information related to the Bank's DB Provisions, including amounts recorded in the Consolidated Statement of Financial Position and the components of defined benefit cost:

	2022	2021
Change in fair value of plan assets:		
Fair value of plan assets at beginning of year	\$ 28,170	\$ 28,531
Interest income	1,589	1,566
Actual return on plan assets	768	(693)
Administrative costs	(91)	(87)
Employer contributions	-	-
Participant contributions	73	66
Benefits paid	(1,364)	(1,213)
Withdrawals from plan	 	 
Fair value of plan assets at end of year	\$ 29,145	\$ 28,170
	2022	2021
Change in defined benefit obligation:		
Benefit obligation at beginning of year	\$ 24,165	\$ 24,389
Current employer service costs	232	275
Participant contributions	73	66

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The effect of assuming an increase of 1 year in life expectancy would increase the benefit obligation by \$0.5 million (2021: \$0.5 million) and pension benefits expense by \$36,000 (2021: \$35,000).

The weighted average duration of the defined benefit obligation is 12.6 years (2021: 12.9 years).

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the year) has been applied when calculating the defined benefit liability recognised in the Consolidated Statement of Financial Position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

The DB Plan owns shares of the Bank valued at \$5.05 million and \$4.29 million as of December 31, 2022 and 2021 respectively.

The major categories of DB Provisions assets at December 31, 2022, are as follows:

	2022	2021
Balance at banks	\$ 845 \$	1,307
Equity instruments	10,591	9,435
Government bonds	13,095	12,771
Other debt instruments	2,618	2,655
Preferred equity	1,773	1,773
Mutual Fund	75	-
Other Assets	222	229
Liabilities	 (74)	
Fair value of plan assets	\$ 29,145 \$	28,170

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Given that the DB Provisions is currently overfunded, the Bank does not expect to make any contributions in 2023 in respect of the DB Provisions.

DB Provisions funds held at the Bank and related interest expense are as follows:

	2022	2021
Deposits from customers	\$ 288	\$ 132
Interest expense	\$ -	\$ -

The remeasurement gain of defined benefit obligation included in other comprehensive income is as follows:

	2022	2021
DB Provisions gain	\$ 766	\$ 9

#### **DC Provisions**

The DC Provisions requires a defined contribution be made by the Bank for plan members. Eligibility in the DC Provisions includes all employees in active employment of the Bank who have at least 1 year of service or have reached the age of 25, and who met the eligibility requirements of the DC Provisions on or after October 1, 2013, or were hired after September 1, 2013. Contributions to the DC Provisions started on November 1, 2013, for eligible employees.

Contributions to the DC Provisions are deposited into the plan account of each employee and administered by the pension plan's investment manager. Employees may choose from three investment options, two of which are investment funds offered by the investment manager and the other being the CB Managed Fund.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The amounts recognised as an expense under the DC Provisions are as follows:

	2022	2021
Pension expense included in staff		
costs	\$ 1,610	\$ 1,639

The DC Provisions owns 171,889 (2021: 283,778) common shares of the Bank. These shares have a market value of \$0.8 million (2021: \$0.9 million) which represents 5.2% (2020: 4.9%) of the DC Provisions assets.

## 23. Commitments and Contingencies

To meet the financial needs of customers, the Bank enters into various irrevocable commitments. These consist of mortgage commitments, letters of credit and other undrawn commitments to lend. Letters of credit commit the Bank to make payments on behalf of customers in the event of a specific act. In addition, contingent liabilities arise because of litigation or similar unforeseen matters.

Loan commitments

In the ordinary course of business, the Bank had commitments as at the reporting date, as follows:

	2022	2021
Mortgage commitments	\$ 9,203	\$ 6,221
Revolving credit lines	26,037	30,671
	\$ 35,240	\$ 36,892

Revolving credit lines are undrawn lending facilities that have been approved by the Bank to meet the requirements of customers. They are revocable at the Bank's discretion. The amount shown represent the maximum amount of additional credit that the Bank could be obligated to extend.

These financial instruments are subject to the Bank's standard credit policies and procedures.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

### Capital commitments

As at December 31, 2022, the Bank had capital commitments of \$0.22 million (2021: \$3.7 million).

### Lease commitments

The future minimum rental payments required under non-cancellable operating leases as at December 31, 2022, are as follows:

Year	2022	2021
2022	-	702
2023	618	338
2024	496	317
2025	236	92
2026	91	85
Beyond 2026	48	 _
	\$ 1,489	\$ 1,534

### Letters of credit

The Bank has a standby letter of credit with PNC Bank for US\$ 3.3 million.

## Liability provisions

The Group is involved in various legal proceedings covering a range of matters that arise in the ordinary course of business activities. As at December 31, 2022, and 2021, the Bank maintained related provisions totalling \$0.2 million while the ruling is pending. These provisions are included in other liabilities in the employee-related line item (Note 15), and are estimates of the loss exposure.

## 24. Risk Management

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. The risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The Group's Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group's Audit Committee is assisted in its oversight role by the Group's Enterprise Risk Management function, which represents the second line of internal control defence; and Internal Audit function, which represents the third line of internal control defence. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Group's Audit Committee.

The Group has exposures to the following risk:concentration risk, capital management risk, interest rate risk, credit risk, liquidity risk, insurance risk, currency and operational risk.

#### a. Concentration risk

Risk concentrations can arise through the Group's exposure to individual counterparties, groups of individual counterparties or related entities; geographical locations; industry sectors; specific products; or service providers. The Group is exposed to the potential loss in value when a significant source of concentration risk moves in an unfavourable direction.

The concentration of risks not specifically identified in other notes to these consolidated financial statements are as follows:

- Geographical concentration The Group has a concentration of risk in respect of the geographical area, as its operations, deposit customers; and significant assets are domiciled within the Commonwealth of The Bahamas.
- Currency concentration The Group has a concentration in respect of currency as its financial
  instruments are significantly denominated in a single currency, the Bahamian dollar. Its other
  significant currency exposure is to the United States dollar, which shows a history of being
  positively correlated to the Bahamian dollar.
- Credit concentration The Group has a concentration of credit risk when a significant
  proportion of borrowers are engaged in similar sectorial activities, and have economic features
  that would cause their ability to meet contractual obligations to be similarly affected by
  changes in economic, political, or other conditions. A significant concentration of the Group's
  borrowers are employees of The Government of The Bahamas or its related entities; and large
  hotel properties operating within the tourism and leisure sectors of The Commonwealth of
  The Bahamas.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

- Product concentration The Group categorizes its loans and advances to customers into loan types including personal, business, residential, and government; and revolving loans of credit cards and overdrafts. The Group has a significant concentration of personal loans and advances to customers.
- Liquidity concentration The Group has a concentration of liquidity risk in its reliance on a particular market to realize its liquid assets; and sources of funding for its lending activities. The concentration of liquidity may also arise in the contract terms of repayment for its financial assets and liabilities. A significant concentration of the Group's investments is in financial instruments issued by the Government of The Bahamas or its related entities. Trading levels in the Commonwealth of The Bahamas, whether on BISX or over-the-counter markets, are generally low, and therefore, the ability of the Group to liquidate large positions may be difficult and prices received may be severely impacted. The Central Bank has created a secondary market for certain debt securities issued by the Government of The Bahamas, and prices currently being observed in this market and over-the-counter approximate the face values of such securities.

The Bank manages its concentration of risks through its internal risk management policies and procedures, specifically stated in, but not limited to, its business continuity and recovery planning strategies; its setting of prudent concentration limits and targets for business performance; and its periodic stress testing of its liquidity and capital contingency plans.

### b. Capital management risk

The Group manages its capital to ensure that it has a strong capital base to support the development of its business. The capital maintained exceeds regulatory capital requirements. The Group maximizes the return to shareholders through optimization of its debt and equity balance. The Group's risk management structure promotes making sound business decisions by balancing risk and reward. It promotes revenue-generating activities that are consistent with the Group's risk appetite, the Bank's policies and the maximization of shareholder return.

The capital structure of the Bank consists of equity attributable to the common equity holders of the Bank, comprising issued share capital, share premium and retained earnings as disclosed in Note 16. The Board's Executive Committee reviews the capital structure at least annually. As part of this review, the Executive Committee considers the cost of capital and the risks associated with each type of capital available to fund its business activities. Based on recommendations of the Executive Committee, the Bank manages its capital structure through the payment of dividends, new share issues, (common or preference) and the redemption of preference shares, as applicable.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

As prescribed by the Guidelines for the Management of Capital and the Calculation of Capital Adequacy issued by the Central Bank, the Bank is required to maintain a capital adequacy ratio of at least 17% (2021: 17%), which is calculated by dividing the Bank's total eligible capital by its total risk-weighted exposures. The Bank's capital adequacy ratio for 2022 was 32% (2021: 27%). The Group's capital is made up of Tier 1 capital only, which includes share capital and retained earnings.

Regulatory capital requirements for Laurentide and Laurentide Insurance Agency Limited are managed through the Bank. The Group's strategy is unchanged from 2021.

Laurentide is licensed to conduct long term insurance business under The Insurance Act 2005 (the "Act").

Under paragraph 60(1)A of The Insurance (General) Regulations, 2010 (the "Regulations") an insurance company is required to have a minimum paid-up and unencumbered share capital of not less than \$3 million. As at December 31, 2022, Laurentide has \$300,300 (2021: \$300,300) in share capital and \$2,750,000 (2021: \$2,750,000) in contributed surplus. Laurentide's Board passed a resolution on December 6, 2011, making the contributed surplus non-distributable.

Laurentide is required to establish and maintain a minimum statutory deposit of \$2 million, such deposit to be held in trust under section 43(2) of the Act and paragraph 62 of the Regulations. The LIM (Laurentide Insurance Management) Statutory Reserve Trust was established on December 20, 2011, with assets valued at \$2,289,300 as at December 31, 2022 (2021: \$2,289,300).

Laurentide is required to maintain a solvency margin under paragraph 90 of the Regulations. For the Regulations, the margin of solvency means the excess of the value of its admissible assets over the amount of its liabilities. The required margin of solvency is the greater of (a) twenty percent of the premium income, including annuity premiums, in its last financial year; or (b) five hundred thousand dollars, plus the minimum amount of capital required. As at December 31, 2022, the minimum margin of solvency was \$959,576 (2021: \$1,303,768). Laurentide's solvency margin at December 31, 2022 was \$45,222,187 (2021: \$44,378,748) resulting in a surplus of \$44,262,611 (2021: \$43,074,980).

Paragraph 68 of the Regulations stipulates that of the value of the admissible assets which Laurentide must at any time have to maintain the minimum margin of solvency required by the Act, at least sixty percent shall be in the form of qualifying assets.

As at December 31, 2022, Laurentide had \$40,799,376 (2021: \$42,907,556) in qualifying assets and \$40,799,376 (2021: \$42,907,556) in admissible assets as defined under paragraphs 70 and 72 of the Regulations, respectively.

During the year, the Group complied with all externally imposed capital requirements.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### c. Interest rate risk

Interest rate risk is the potential for a negative impact on the Consolidated Statement of Financial Position and/or Consolidated Statement of Profit or Loss and Other Comprehensive Income arising from adverse changes in the value of financial instruments as a result of changes in interest rates.

Interest rate risk or interest rate sensitivity results primarily from differences in the repricing dates of assets and liabilities. Interest rate risk exposures or "gaps" may produce favorable or unfavorable effects on interest margins depending on the nature of the gap and the direction of interest rate movement and/or the expected volatility of those interest rates. When assets have a shorter average maturity than liabilities, an increase in interest rates would have a positive impact on net interest margins, and conversely, if more liabilities than assets mature or are repriced in a particular time interval then a negative impact on net interest margin would result.

The consolidated gap position shows more assets than liabilities repriced in periods greater than one year. This is a typical position for a financial institution with a large personal customer base.

The Group manages its interest rate sensitivity gaps primarily by matching the maturity and repricing terms of its assets and liabilities. The Bank's interest-bearing financial liabilities, which are primarily its deposits to customers, are not linked to market interest rates and are set by management's interest rate schedule and can be reset following the maturity of any customer deposit. The interest rate schedule is reviewed periodically by the Bank's Asset-Liability Management Committee, and approved by the Board of Directors. The Bank's loan portfolio is generally not linked to market rates, except for mortgage loans with variable interest rates linked to the Bahamian dollar prime and can be reset following the maturity or restructure of any mortgage loan. Loan product interest rates are set by management's interest rate schedule. The interest rate schedule is reviewed periodically by the Bank's Asset-Liability Management Committee, and approved by the Board of Directors. The Group's investment portfolio is generally linked to market interest rates, and the Group does not attempt to hedge specifically against the impact of changes in market interest rates, as it manages by tactical allocation across instrument tenors and cash holdings. The Bank analyzes its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration changes in interest rates. Based on these scenarios, the Bank calculates the impact on profit and loss of a defined interest rate shift. The following table sets out the Group's interest rate risk exposure as at December 31, 2022, which represents the Group's risk exposure at this point only.

### Interest Rate Sensitivity

If market interest rates increase/decrease by 50 basis points and all other variables remain constant, the Group's profit over the next 12 months is estimated to increase/decrease by \$424K (2021: \$504k).

Notes to Consolidated Financial Statements

### d. Credit risk

Credit and counterparty risk is the potential for loss due to the failure of a borrower, endorser, guarantor or counterparty to repay a loan or honour a financial obligation. This is the most significant measurable risk faced by the Group.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The Bank's credit policies are designed to maximize the risk/return trade-off. The Bank's credit policies, including authorized lending limits, are based on segregation of authority and centralized management approval with a periodic independent review by the Bank's Internal Audit department. Consumer credit is assessed and authorized in branches within credit policies established by the Bank. Credit scoring systems are used to ensure that these policies are consistently applied across the Bank. A key factor in the Bank managing and constraining its credit risk exposure is the close review and follow up of its credit portfolios to quickly identify indications of potential failure to perform according to the terms of the contract and to take the appropriate steps to maintain or restore these accounts to performing according to the terms of the contracts.

The Group places its deposits with banks in good standing with the Central Bank.

### **Expected Credit Loss Measurement**

Expected credit loss is the discounted product of the probability of default ("PD"), loss given default ("LGD") and exposure at default ("EAD") parameters defined as follows:

- PD The estimate of the likelihood of default over a given period.
- LGD The estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including discounted cash flows from any collateral. LGD is expressed as a percentage of the EAD.
- EAD The estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, and expected drawdowns on committed facilities.

Except where specifically indicated for a class of financial assets, the ECL method is applied consistently across loans and advances to customers, and investments.

For loans and advances to customers, excluding those exposures where the counterparty is the Government of The Bahamas, the Bank uses a Point-in-Time ("PIT") analysis while having regard to historical loss data forward-looking macro-economic data.

The lifetime PD of these exposures is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loan. PDs are then adjusted for IFRS 9 to incorporate forward-looking information. This is repeated for each economic scenario defined by the Bank.

For exposures (including both loans and advances to customers, and investments) where the counterparty is the Government of The Bahamas, the Bank uses the historical 12-month PD and lifetime PD of the counter-party's credit rating published by credit rating agencies which are then adjusted for IFRS 9 to incorporate forward-looking information.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The table below shows the average lifetime PD for financial instruments in which ECL amounts are recognised.

### **Average Lifetime PD**

	2022	2021
Residential mortgage	54%	67%
Business	43%	55%
Personal	29%	45%
Credit card	47%	50%
Government	13%	11%
Investments	9%	5%

Included in the average lifetime PD for credit cards are overdrafts and guarantees.

The estimate of expected cash shortfalls reflects the cash flows expected from collateral and other credit enhancements that are part of the contractual terms and are not recognised separately by the Bank (e.g. properties collateralized for mortgage loans are not recognised on the Bank's balance sheet).

Such estimates reflect the amount and timing of cash flows that are expected from foreclosure on the collateral less the costs of obtaining and selling the collateral, irrespective of whether foreclosure is probable.

Any cash flows that are expected from the realisation of the collateral beyond the contractual maturity of the contract are included in ECL modelling.

Where appropriate, the Bank considers the time to sell and the cost to sell. Further, "Forced Sale" discounts are also included to account for reductions in value due to forced sales and deterioration of collateral held.

In addition, the cost directly associated with realising collateral forms part of the ECL calculation. In the short term, this is set by the Bank's executive management and is based on their understanding of the market, the economic environment and the Group's experience. This is expressed as a discount factor (nominal value). The Bank also includes recovery cash flow assumptions in LGD which are discounted back to the point of default at the original effective interest rate.

For government loans and securities, the Bank used its judgment in the assessment of a significant increase in risk and migration of balances to progressive stages. The assessment takes into consideration the risk rating of external agencies (i.e. Moody's) and the economic environment of the country.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

### Internal Risk Ratings

Internal risk ratings are assigned according to the Group's risk management framework. Changes in internal risk ratings are primarily reflected in the PD parameters, which are estimated based on the Group's historical loss experience at the relevant risk segment or risk rating level, adjusted for forward-looking information.

Each credit facility is individually risk-rated (from 1 – being the lowest to 8 – being the highest) concerning its probable performance. Risk factors, which are based on the Group's current policy and procedures, are used to determine each loan's risk rating. These risk factors are assigned scoring based on a tiered approach with a higher score being assigned as risk factors increase. The factors and the range score assigned to them are then used to calculate a single risk rating.

## Weighting of Expected Credit Loss

A multiple probability model has been adopted by the Group. The model was developed to allow scenario analysis and management overlay where deemed necessary (this applies to the weighting assigned to the estimates grouping). Three calculations for ECL estimates are generated representing base case, best case and worse case. Once an ECL calculation has been developed for each scenario, a weight is applied to each estimate based on the likelihood of occurrence to arrive at a final weighted ECL. The level of estimation uncertainty has increased since December 31, 2020, as a result of the economic and social disruption caused by the impact of the Covid-19 pandemic.

This includes significant judgments relating to:

- The selection and weighting of macro-economic scenarios;
- The effect of government and other support measures implemented to mitigate the negative economic impact;
- The uncertainty over the duration and severity of the effect of the pandemic as well as the timing and duration of the recovery;
- The assessment of the impact of the macro-economic scenarios on the ECL given the unavailability of historical information for a similar event;
- The identification and assessment of significant increases in credit risk and impairment especially
  for loan facilities where borrowers have received support under various government and bank
  support schemes; and
- The identification and assessment of significant increases in credit risk and impairment especially for exposures where the counterparty's credit rating has deteriorated significantly since initial recognition.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The weighting assigned to each scenario as at December 31, 2022 and December 31, 2021, was as follows:

### **December 31, 2022**

	Base	Best	Worst
Residential	65%	5%	30%
Business	65%	5%	30%
Personal	65%	5%	30%
Credit Card	100%	0%	0%
Government	65%	5%	30%
Investments	65%	5%	30%

## **December 31, 2021**

	Base	Best	Worst
Residential	70%	0%	30%
Business	70%	0%	30%
Personal	70%	0%	30%
Credit Card	100%	0%	0%
Government	70%	0%	30%
Investments	70%	0%	30%

### Significant Increases in Credit Risk and Incorporation of forward-looking indicators

At each reporting date, the Group assesses whether there has been a significant increase in credit risk for exposures since initial recognition by comparing the risk of a default occurring over the remaining expected life from the reporting date and the date of initial recognition. The assessment considers borrower-specific quantitative and qualitative information without consideration of collateral, and the impact of forward-looking macroeconomic factors.

The common assessment for significant increases in credit risk on loan portfolios normally includes macroeconomic outlook, management judgment, and delinquency and monitoring. Forward-looking macroeconomic factors are considered as part of the macroeconomic outlook. The importance and relevance of each specific macroeconomic factor depend on the type of product, characteristics of the financial instruments and the borrower.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The ECL model may not always be able to capture all reasonable and supportable information that may indicate a significant increase in credit risk. Qualitative factors may be assessed to supplement the gap. Examples of this include changes in adjudication criteria for a particular group of borrowers, changes in portfolio composition and natural disasters impacting the portfolio. With regards to delinquency and monitoring, there is a rebuttable presumption that the credit risk of the financial instrument has increased since initial recognition when contractual payments are more than 30 days overdue.

In October 2022, the international credit rating agency, Moody's Corporation ("Moody's"), downgraded The Bahamas' credit rating to B1 from Ba3, while also improving its economic outlook for The Bahamas from negative to stable. During the prior year, on September 17, 2021, Moody's reviewed The Bahamas' credit rating and downgraded The Bahamas from Ba2 to Ba3.

S&P Global Inc. ("S&P"), in November 2022, affirmed its 2021 sovereign credit ratings on The Bahamas, with a stable outlook. During the prior year, on November 12, 2021, S&P reviewed The Bahamas' credit rating and downgraded it from BB- to B+.

The credit ratings of B1 and B+ of Moody's and S&P respectively are both considered to be non-investment grade ratings. The aforementioned credit risk downgrades are considered indicative of a SICR for certain exposures (including both loans and advances to customers, and investments) which originated or were acquired by the Bank before October 2022, and this has resulted in certain exposures being classified in stage 2 with a lifetime ECL being recognized.

### Maximum Exposure to Credit Risk

For financial assets recognised on the Consolidated Statement of Financial Position, the exposure to credit risk generally equals their carrying amount. For standby letters of credit, the maximum exposure to credit risk is the maximum amount that the Bank would have to pay if the standby letters of credit are called upon.

For mortgage commitments and revolving credit lines that are irrevocable over the life of the respective facilities, the maximum exposure to credit risk is the full amount of the committed facilities.

The following tables contains an analysis of the credit risk exposure of financial assets for which an ECL allowance is recognised.

### Transfers between Stages

At each reporting date, the Group assesses whether the credit risk on its financial assets has increased significantly since initial recognition. The assessment of whether an asset is in stage 1 or 2 considers the relative change in the probability of default occurring over the expected life of the instrument, and is not assessed based on the change in the amount of the expected credit losses. This involves setting quantitative tests combined with additional indicators such as credit risk classification and other observable inputs.

Transfers between Stages 1 and 2 are based on the assessment of significant increases in credit risk relative to initial recognition. The impact of moving from 12-month expected credit losses to lifetime expected credit losses, or vice versa, varies by portfolio and is dependent on the expected remaining life at the date of the transfer. Stage transfers may result in significant fluctuations in the Group's expected credit losses.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

## Movement in Allowance for ECL by Stage

The allowance for ECL recognised in the period is impacted by a variety of factors, including but not limited to:

- Transfers between Stage 1 and 2 or 3 due to financial assets experiencing significant increases (or decreases) in credit risk or becoming credit-impaired in the period, and the consequent "step up" (or "step down") between 12-month and lifetime ECL;
- Additional allowances for new financial assets recognised during the period, as well as releases for financials assets de-recognised in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs, and LGDs in the period, arising from regular refreshing of inputs to the model;
- Impacts on the measurement of ECL due to changes made to models and assumptions;
- Financial assets de-recognised during the period and write-offs of allowances related to the assets that were written off during the period; and
- The number of days past due of a personal loan facility, as the LGD increases as the number of days past due increases.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Financial assets are past due when a counterparty has failed to make a payment when contractually due.

The average mortgage balance was \$110,103 (2021: \$114,756) while the average business account balance was \$215,805 (2021: \$227,728). The average consumer balance was \$22,689 (2021: 22,927).

The largest exposure to a single loan customer, other than the Government of The Bahamas (Note 9), was approximately \$1.6 million (2021: \$1.7 million). Mortgage loans and business loans can extend up to 35 years and 10 years, respectively while consumer loans can extend up to 10 years.

The credit quality of loans and advances to customers is shown in the following table:

	2022							
		Original

All financial assets outside of loans and advances to customers are neither past due nor impaired.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The table below shows the distribution of loans and advances to customers that are neither past due nor impaired:

	2022	2021
Satisfactory risk	\$ 678,259	\$ 653,870
Watch list	 2,565	 2,909
	\$ 680,824	\$ 656,779

Watch list accounts are those that are exhibiting signs of distress or accounts that have been in distress in the past. Indications of distress include consistent arrears reflecting reduced income of the borrower, death of one of the parties to the loan, marital issues or divorce, illness, diminished business cash flows, etc.

Conversely, satisfactory accounts are accounts that are generally being serviced as agreed with no material indications that the borrower will default.

The analysis of the age of loans and advances to customers that were past due but not impaired is as follows:

	2022									
	Residential				_					
	mo	ortgage	B	usiness	P	ersonal		card		Total
Past due up to 29 days	\$	19,311	\$	2,793	\$	57,852	\$	4,187	\$	84,143
Past due 30 - 59 days		3,258		568		13,162		1,910		18,898
Past due 60 - 89 days		2,402		306		8,866		834		12,408
	\$	24,971	\$	3,667	\$	79,880	\$	6,931	\$	115,449

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### Restructured loans

Restructuring activity is designed to manage customer relationships, maximise collection opportunities and, if possible, avoid foreclosure or repossession. Such activities include extended payment arrangements, approved debt management plans, deferring foreclosure, modification, loan rewrites and/or deferral of payments pending a change in circumstances. Restructuring of consumer loans normally results in additional collateral, a co-signer or guarantor or a garnishee of salary being added to the loan. Following the restructuring, an overdue consumer account is normally reset from delinquent to current status. Restructuring policies and practices are based on indicators or criteria which, in the judgment of management, indicate that repayment will probably continue. These policies are continually reviewed and their application varies according to the nature of the market, the product, and the availability of empirical data.

In the Group's current IFRS 9 ECL weighted risk rating model, restructured accounts attract a higher risk weighting than accounts that have not been restructured.

### Collateral Relative to Loans and advances to customers

It is the Bank's policy to determine that, at the time of origination, loans are within the customer's capacity to repay, rather than to rely excessively on security. Loans classified as personal typically take into account the customer's standing and employment and credit histories and are generally unsecured. The Bank has guidelines as part of its credit policy on the acceptability of specific classes of collateral which are reviewed regularly.

The principal collateral types are as follows:

- **Personal** garnishees over salary and chattel mortgages;
- **Residential mortgage** mortgages over residential properties;
- Commercial and industrial charges over business assets such as premises, stock, and debtors;
- Commercial real estate charges over the properties being financed.

The Group closely monitors collateral held for financial assets considered credit-impaired, as it becomes more likely that the Group will take possession of the collateral to mitigate potential credit losses. Financial assets that are credit-impaired and related collateral held to mitigate potential losses are shown below.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

	2022											
		Gross carrying amount			Net carrying amount		Value of collateral held					
Residential mortgage	\$	30,510	\$	8,628		21,882	\$	30,403				
Business		3,350		1,328		2,022		2,824				
Personal		31,075		25,222		5,853		179

	\$	65,953	\$	35,703	\$	30,250	\$	33,406				

	 2021									
	Gross		Allowance		carrying	Value of				
	 exposure	fo	or ECL	a	mount	colla	teral held			
Residential mortgage	\$ 37,812	\$	8,823	\$	28,989	\$	37,560			
Business	4,297		890		3,407		3,999			
Personal	96,640		75,259		21,381		449			
Credit card	 2,968		1,502		1,466		-			
	\$ 141,717	\$	86,474	\$	55,243	\$	42,008			

The Group's policies regarding obtaining collateral have not changed during the reporting period. There has been no significant change in the overall quality of the collateral held by the Group since the prior period.

### ECL sensitivity analysis

If the loss given default increases/decreases by 5% and all other variables remain constant, the Group's ECL is estimated to increase/decrease as noted below.

Loss	Given	Default	(LGD)

	,	,	
		2022	2021
Residential mortgage	\$	189 \$	233
Business		12	4
Personal		3,437	1,746
Credit cards		9	148
Government		5	18
Investments		162	149
	\$	3,814 \$	2,298

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

### e. Liquidity risk

Liquidity risk is the potential for loss if the Group is unable to meet financial commitments promptly at reasonable prices as they fall due. Financial commitments include liabilities to depositors and suppliers, and lending, pledging and investment commitments. Managing liquidity and funding risk is essential to maintaining both depositor confidence and stability in earnings.

The Group manages liquidity and funding risk by ensuring that sufficient liquid assets and funding capacity are available to meet financial commitments, even in times of stress. The Directors' Executive Committee oversees the Group's liquidity and funding risk management framework which includes operating within clearly defined Board limits, regulatory liquidity requirements and strong effective processes to monitor and manage risk, including contingency plans to facilitate managing through a distressing situation.

Included in deposits from customers are deposits totaling \$194.2 million (2021: \$234.7 million) from a single customer representing 12.85% (2021: 16.6%) of the total deposits from customers. The amounts are comprised primarily of certificates of deposits from a related party.

There have been no changes in the policies and procedures for managing liquidity risk compared to the prior year.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

The following tables summarize the cash flows from financial instruments into maturity groupings, based on the remaining period to the contractual maturity dates. The cash flows presented are undiscounted.

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

Management of the Bank's short-term liquidity gap

In the normal course of business, the Group experiences a short-term liquidity gap, where the amounts it holds as deposits for customers may exceed its available liquid assets matching the same maturity. The Group manages this short-term liquidity gap by establishing a Liquidity Buffer of marketable securities with a long-term duration that can be liquidated or applied as collateral to meet unexpected payment obligations while continuing normal banking activities; and without obtaining new funding. The Group also monitors its liquid assets in relation to the demand and savings deposits from customers to ensure that the liquid assets are sufficient to fund withdrawals of demand and savings deposits. Liquidity risks related to certificates of deposits are managed with contractual limitations on the timing and amount of early withdrawals. The Group also has access to inter-bank lending facilitated by The Central Bank of the Bahamas should additional liquidity be needed.

### f. Insurance risk

Insurance risk is the risk of loss resulting from the occurrence of an insured event. Laurentide issues contracts for credit life insurance only on loans written by the Bank. All lives insured are debtors under closed-end consumer credit transactions that arise from direct loans with the Bank. The underwriting strategy aims to ensure that the underwritten risks are well diversified to achieve a sufficiently large population of risks to reduce the variability of the expected outcome. At present, this risk does not vary significantly in relation to the location of the risk insured by the Group.

To mitigate risk, no insurance contract is issued to persons aged 65 and over. Prior to 2017, no insurance contract was issued to persons aged 60 and over. The amount of life insurance at risk on any one policy is as follows:

Policies written up to 2016:

Auto loans - Maximum of \$10,000 or net indebtedness to the Bank All other loans - Maximum of \$20,000 or net indebtedness to the Bank

Policies written after 2016:

All loans - Maximum of \$70,000 or net indebtedness to Bank

## g. Currency risk

Currency risk is the risk that the fair values and/or amounts realised on settlement of financial instruments, and settlements of foreign currency transactions, will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognised monetary assets and liabilities are denominated in currencies other than the Bank's functional currency. The Bank is not subject to significant currency risk as its foreign currency transactions and monetary assets and liabilities are predominately denominated in currencies with foreign exchange rates currently fixed against the Bank's functional currency.

Notes to Consolidated Financial Statements

Year ended December 31, 2022, with corresponding figures as at and for the year ended December 31, 2021

(All amounts stated as actual amounts, except tabular amounts which are expressed in Bahamian \$000s)

#### h. Operational risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes or systems, human error or external events not related to credit, market or liquidity risks. The Group manages this risk by maintaining a comprehensive system of internal control and internal audit, including organizational and procedural controls. The system of internal control includes written communication of the Group's policies and procedures governing corporate conduct and risk management; comprehensive business planning; effective segregation of duties; delegation of authority and personal accountability; careful selection and training of personnel and sound accounting policies, which are regularly updated. These controls and audits are designed to provide the Group with reasonable assurance that assets are safeguarded against unauthorized use or disposition, liabilities are recognised, and the Group is in compliance with all regulatory requirements.

### i. Off balance sheet risk

In the normal course of business, and in order to meet the financing needs of its customers, the Group may enter into financial instruments with off balance sheet risk. These instruments can be classified into the commitments category. The Group mitigates the risks associated with such financial instruments by transacting only with well-established, high credit quality financial institutions. At this time, the Group has no exposure to these instruments with the exception to letters of credit and guarantees (Note 23).

### 25. Subsequent Events

The Bank has declared an extraordinary dividend for common shares, to all shareholders of record February 21, 2023, of 2 cents per share, totaling \$5.9 million.

The Bank has declared a quarterly dividend for common shares, to all shareholders of record at March 15, 2023, and paid the dividend in the amount of 2 cents per share, totaling \$5.9 million.
