CHAIRMAN'S REPORT ON UNAUDITED RESULTS MARCH 31, 2024

For the three months ended March 31, 2024, the Bank recorded a consolidated net profit of \$17.4 million compared to a consolidated net profit of \$19.6 million for the same period in the prior year. The net profit of the current period reflects a further move towards normalization of the Bank's operations, compared to 2023, which benefited from the strong rebound of the Bahamian economy.

The Bank's net interest income grew by 3% when considering quarter-on-quarter business performance, and is primarily the result of strategic management of the Bank's investments and improvement in the quality of loan assets. The latter is driven by a posture in credit underwriting to manage growth safely, price risk effectively and manage delinquency levels. Additionally, interest expense has been controlled. The Bank's non-interest income showed a mild contraction for the first three months of 2024 compared to the same period in 2023. The prior period benefited from the unrealized gains of the Bank's equity investment, which was sold later in the same year, and therefore did not have a carry-forward benefit to the Bank in 2024. The Bank continues to identify opportunities to expand its transaction-based fee income. Non-interest expense is higher by 14%. Expenses are primarily impacted by the timing difference of several non-controllable operating costs not being reflected until the second and third quarters of 2023 versus being expensed from the beginning of the year in 2024. These are expected to normalize as the year progresses. Higher expenses also reflect the increased insurance premiums the Bank is required to pay to the Deposit Insurance Corporation ("DIC"). The DIC premium rate has doubled quarter-on-quarter, adding approximately \$800 thousand to the Bank's operating costs for 2024, above the same charge in 2023. The Bank's cost structure is also impacted by the continued investment in its technology infrastructure to support the expansion of services, and the overall business resilience and technology optimization strategy.

As an indication of the Bank's risk management and commitment to the safety and soundness of our operations, the Bank maintains a fortified consolidated financial position with a strong level of liquidity (available cash and unencumbered high-quality liquid assets at market value) and capital. which positions the Bank well to adapt to stresses posed by the current business environment. The Bank is required to hold a minimum level of liquid assets against possible liquidity risk, and as of March 31, 2024, has a liquidity ratio of 69%, well above the regulatory limit of 20%. The Bank's capital adequacy ratio is over 30% and is well above the regulatory requirement of 17%.

During the quarter, the Board of Directors approved a regular quarterly dividend of \$0.03 per share. The dividend represents a 50% increase compared to the regular quarterly dividend of \$0.02 per share for the same period in 2023. The total regular dividends paid through to the end of the first quarter of 2024 is \$8.9 million (2023: \$5.9 million).

I sincerely thank our team of professionals who deliver exceptional service to our customers daily. Their commitment to excellence truly inspires me. I also thank our shareholders and customers for their continued, unwavering support.
